

Everything Going Digital?

First of all, I would like to wish every dedicated Satanist a Happy Beltane. Beltane is the Satanic New Year. It is a time of renewal and celebration. Many of us performed our dedication to Satan on the Eve of Beltane.

I am going to make this short and to the point. Both Satan and Lilith definitely wanted me to post this. I know we have important and influential people here in these groups who read JoS articles and sermons. Teamwork is always essential. One alone...together strong. Teamwork fills in gaps in the way of everyone has their strong and weak points, certain knowledge and such and most important, where one person may not be able to act, another can act and accomplish in certain areas of influence. We Satanists must all work together and accomplish what we are able to do best, as individuals. Each individual accomplishment contributes to the whole.

It is a very sad fact that the human race has made the same mistakes repeatedly over the millennia. Once civilization becomes advanced to a certain point, it is then systematically and brutally destroyed by the enemy. Satan stands for knowledge. When knowledge becomes extensive, as it is right now, especially with the modern technology, the internet, and the ease of communications, you can bet the enemy will work ruthlessly to destroy all of this. The Jews are doing it right now. Because they cannot control the internet, they work to destroy the freedom of speech. When this will fail, they will work to destroy everything.

Look at history. Christianity was forced in, no different from Jewish communism, [both use the "Year Zero"] and with this, because it is a hoax and a total lie and a plague upon humanity, entire libraries, schools, and any places of learning were burnt to the ground. Anyone who had any knowledge of the occult/spiritual, or who was a scholar or a learned person was murdered by Christians. The Jews have always controlled the Christians. The Jew communists did the very same in destroying entire libraries, and in addition, and murdered all of the intellectuals. In order to have a slave-state, the populace must be ignorant and ideally illiterate. As I have stated before, the Jews then come in and rewrite history as they see fit and place themselves as the "Chosen of God," the elite and the supreme. Now everything that was hijacked from the enslaved populace is now attributed to Jewish inventions.

Beltane aka as May Day is a very important Pagan holiday. Jewish communism hijacked this day and turned it into a major communist holiday, no different from how the Christian Church hijacked all of the Pagan holidays, and attempted at making them their own, which they are not. There is a full article regarding this at <http://www.exposingchristianity.com> Look to "The Stolen Year." For those of you who are new, Christianity, just like its Jewish masters, has nothing of its own. Nothing.

The point of this sermons now is another very serious warning sign, that of "Digital Libraries." Now some argue that books will survive this, along with the digital libraries and with nearly everything going digital. Be aware... Look at history. This is not to say digital is something unfavorable, but everyone needs to be aware of what can be done with this in the hands of the enemy. If hard copies are properly preserved, then there shouldn't be a problem. BUT, given history... do you really think so?

We won't get Jewed Again! ????

With everything digital, anyone in power can have not only complete censorship, but can also pull the plug on it all. If no hard copies remain, then what? It took Europe over 1,000+ years to recover from what the Christians did. In Ancient Egypt, our Gods etched their symbols into stone.

This is a most serious issue. For those who understand, I need say no more.
